PROFESSIONAL SUMMARY

Analytical and detail-oriented Computing Systems undergraduate at Ulster University with hands-on experience in SQL database querying, data cleaning, and KPI modelling. Proven track record of managing high-volume order processing and inventory accuracy in fast-paced retail operations. Seeking an entry-level Data Analyst role to translate raw operational data into actionable business insights.

TECHNICAL SKILLS

- Databases & Querying:** SQL (SQLite, PostgreSQL), Relational Database Design, Data Cleaning, Aggregations, Window Functions
- Data Analysis & Tools:** Python (Pandas, NumPy), R, Microsoft Excel (Pivot Tables, VLOOKUP/XLOOKUP), DB Browser for SQLite
- Developer Tools & Workflow:** Git, GitHub, VS Code, Markdown
- Core Competencies:** KPI Calculation, Retail Analytics, Data Standardization, Problem Solving

PROJECTS

Blinkit Grocery Sales Analysis

SQL, DB Browser for SQLite, GitHub

<https://github.com/siyam1974/blinkit-grocery-sales-analysis>

- Engineered an end-to-end SQL exploratory analysis on 8,500+ retail sales records to evaluate category revenue, store sizing, and location tier performance.
- Standardized inconsistent category labels using SQL UPDATE, IN, and WHERE filters to eliminate duplicate grouping errors during aggregation.
- Calculated core executive sales KPIs (Total Revenue, Average Item Sales, Unit Volume) using aggregate functions (SUM, AVG, COUNT, ROUND).
- Segmented inventory into dynamic price bands using CASE WHEN conditional logic to identify top-performing product pricing tiers.

WORK EXPERIENCE

Sainsbury's — Online Assistant

Dec 2024 – Present

London, UK

- Achieved a 98%+ pick accuracy rate across 100+ daily online orders by standardizing handheld-scanner verification checks, reducing mis-pick-driven customer complaints.
- Reduced out-of-stock order cancellations by **[70]** % by building a routine for tracking real-time inventory discrepancies and flagging stock gaps before they hit customer orders.
- Collaborate with store operations to optimize item picking routes, improving order assembly throughput during peak hours.
- Ensure precise system logging during item substitutions to maintain catalog data integrity across the online fulfilment database.

EDUCATION

Ulster University — London, UK

Expected Graduation: Sept 2027

BSc (Hons) Computing Systems

- Relevant Modules: Database Systems, Data Structures & Algorithms, Systems Analysis, Web Development, R programming.
